Medicine

Korean Medicine Center

We diagnose our patients according to their constitution under the basis of the cooperation of Korean and modern medicine. Also, we use the best herbal ingredients to safely provide the greatest Korean medicine to our patients.

Stroke & Incurable Disease Clinic

Palsy, stroke, concussion, ischemia, hemiplegia, cerebral palsy, epilepsy (convulsion & development disorders)

Anti-aging Medicine Clinic

Functional recovery, immunity strengthening, tissue cell regeneration, aging prevention

Internal Medicine Clinic

Gastritis, gastric ulcers, reflux esophagitis, hepatitis, liver cirrhosis

Spine & Joint Clinic

Lumbago (back pain), lumbar disc herniation, neck disc herniation, degenerative osteoarthritis, adhesive capsulitis, shoulder arthritis, rheumatic arthritis

College Entrance Examinee Clinic

Anxiety, depression, concentration improvement, body fatigue, weakness improvement, immunity strengthening

Rhinitis Clinic

Rhinitis, allergic rhinitis, chronic paranasal sinusitis, intranasal diseases

Infertility Clinic

Habitual miscarriage, natural miscarriage, infertility, menstrual cramps, menstrual irregularity

Traffic Accident Clinic

Pain management, ligament and muscle injury management, traumatic stress disorder

Dermatology & Obesity Clinic

Eczema, acne, contact dermatitis, purpura, fine wrinkles, alopecia areata (circular balding), shingles, boils, weight management

Sasang Constitution Clinic

Constitution determination and diagnosis

Constitution-specific prescription Constitution-specific diet and lifestyle habit improvement

Spine Center

The spine - the pillar of our body Nasaret International Hospital uses professional examination and treatment to protect our patient's spine health.

Surgical Treatment

- Fine microscopic laser disc removal (neck, back)
- Uniportal bilateral foraminotomy (stenosis microscopic nerve expansion)
- Mini posterior lumbar interbody fusion
- Neck and back artificial disc replacement surgery
- Vertebroplasty
- Artificial ligament back fixation surgery
- Neck and back spine fusion surgery

Non-surgical Treatment

- Neck and back disc endoscopy
- Neck and back stenosis endoscopy expansion
- Endoscopy laser disc removal
- Endoscopy high frequency disc arthroplasty
- Endoscopy laser spine expansion
- Epidural endoscopy neuroplasty
- Neck and back endoscopy fiber disc arthroplasty
- High frequency reciprocal decompression
- Spine stenosis balloon expansion
- Epidural adhesion removal
- Neuroplasty
- Neck and back manual therapy and strengthening exercise therapy

Joint Center

Through the systematic cooperative system of Korean and modern medicine, we will put the ONE STOP service of diagnosis-surgery-rehabilitation into effect.

Surgical Treatment

- Upper limb arthroplasty (shoulder, elbow)
- Lower limb arthroplasty (hip, knee, and ankle joints)
- Cartilage regeneration surgery (knee joint, ankle joint stem cell surgery)
- Ligament reconstruction surgery
- Complex compound limb fracture surgery
- Other arthroscope surgeries

Non-surgical Treatment

- Injection treatment
- Joint manual or rehabilitation therapy

Endoscopy Center

Nasaret International Hospital's Endoscopy Center provides examinations along with a ONE STOP endoscopic treatment.

Diagnostic Endoscopy

Gastroscopy and colonoscopy examinations

Treatment Endoscopy

EMR, ESD, ERCP, gastrointestinal bleeding

Gastrointestinal Clinic

Gastritis, gastric ulcer, gastric tumor, early gastric cancer, gastroesophageal reflux disease

Colon Clinic

Colon polyp, colorectal cancer, inflammatory bowel disease

Rehabilitation & Manual Therapy Center

The Rehabilitation and Manual Therapy Center is built upon a systematic diagnostic system that supports modern medicine's manual orthopedic physical therapy and rehabilitation therapy trends.

Rehabilitation Treatment Center

Language therapy, occupational therapy, physical therapy

Manual Therapy Treatment Center

Scoliosis, kyphosis, bowed legs (o-shaped legs), non-surgical back and neck disc treatment, strength reinforcement after spinal disc surgery, turtle neck syndrome

Target:

Neurological Disorders

Stroke, cerebral infarction, cerebral hemorrhage, spinal injury, traumatic brain injury, Parkinson's disease, muscle diseases, etc.

Musculoskeletal Disorders

Arthritis, paresthesia, artificial joint replacement surgery, adhesive capsulitis, sports damage, etc.

Pain-related Disorders

Joint pain, muscle pain, back pain, traumatic pain syndrome, etc.

Stroke Center

Initial responses to stroke cannot be delayed! Nasaret International Hospital provides treatment before it is too late.

With the perfect cooperation of the Neurosurgery, Emergency Medicine, Rehabilitation, Korean Rehabilitation and Korean Internal Medicine departments, we are always on standby 24 hours a day, 365 days a year to prepare initial treatment for stroke patients.

Using MRI(magnetic resonance imaging) and CT(computed tomography) to precisely examine the patient's brain vessels, we are accurately checking our patients' conditions to treat them properly. Also, we are helping our patients quickly return to everyday life by treating patients with acute or chronic damage to the brain by independently running Rehabilitation(Korean and modern) Treatment Centers and Physical Therapy Centers.

Anti-aging & Longevity Center

The Anti-aging Longevity Center uses the cooperation of Integrative Functional Medicine and Family Medicine (Dermatology & Obesity Clinic) in order to treat aging and prevent or treat diseases through a TOTAL HEALTH CARE SYSTEM so that patients can live and maintain a young and healthy life.

Personalized Integrative Functioning Injections

- Brain function improvement injection
- Blood vessel detox injection
- Immune function improvement injection
- Chronic fatigue and incurable disease treatment injection

Dermatology & Obesity Injection Treatments

- Skin whitening nutrition injection
- Skin resilience regeneration injection
- Body slim injection
- Antioxidant anti-aging injection

Breast & Thyroid Center

We are increasing the quality of modern women's lives by cooperating the diagnosis from a breast and thyroid specialist and the diagnosis from the Internal Medicine, OB/GYN, and Urology departments.

Breast Cancer Clinic

- Breast exam, breast ultrasound
- Breast-Gun biopsy
- Mammotome examination, MRI

Mammotome Clinic

Biopsy Examination : diagnosis of breast cancer from suspected lumps

Surgery: total removal of lumps that have been tested positive

Thyroid Clinic

- Thyroid nodule
- Hyperthyroidism
- Hypothyroidism
- Thyroid cancer surgery
- Thyroid high frequency resection
- Other thyroid disorders (Thyroiditis, puerperal thyroiditis goiter, thyroid cancer)

Hemodialysis Center

With 23 beds, Nasaret International Hospital's Hemodialysis Center has installed the latest medical equipment - 24 of the high efficiency dialysis hemodialyzer FMC - in order to provide a warm and comfortable environment for our patients to receive dialysis.

Nasaret International Hospital's professional dialysis equipment is a dialysis machine from FMC Korea (Fresenius Medical Care, which can only be installed by a nephrologist) .

Dialysis machine

(FMC 4008-V10 Germany)

17(HD equipment)

Latest high efficiency hemodialyzer

(FMC 5008S Germany)

7(HDF equipment)

High efficiency dialysis equipment

High efficiency dialysis equipment - (FMC 5008S HDF, hemodiafiltration)

Dialysis equipment that can remove polymeric waste materials that is not possible with hemodialysis.

Dermatology, Obesity, and Plastic Surgery Center

With the cooperation of the Dermatology & Obesity Clinic and the Otorhinolaryngology department, we are able to provide our patients with personalized solution plans.

Cosmetic Surgery Clinic

Fillers, botox, thread lifting

Skin Laser Clinic

- Whitening (IPL, laser toning)
- Scar (fractional laser)
- Double laser(wrinkles, elasticity, lifting)

Obesity Treatment Clinic

- HPL injection
- LLD injection (Lymphatic circulatory lipolysis)
- Carboxytherapy, high frequency treatment

Nose Surgery Clinic

- Nose surgery improvement
- Re-surgery for plastic surgery

Stem Cell Treatment Center

Damaged cartilage area

Regenerated cartilage area

Stem cell treatment - a regenerative therapy that treats knee joints by preserving the knees of arthritis patients - all done by the Orthopedic Joint Center!

Benefits of our hospital's stem cell therapy treatment:

- Treating osteoarthritis occurring from degenerative or repetitive trauma through a single surgical procedure
- Expect constant treatment effects through prior selection of optimum stem cells separated from cord blood
- Allogeneic stem cells from cord blood is separated so that patients' age, disease, and nutrition status does affect the results
- Can be used immediately upon reservation without cultivation period

Nasaret International Hospital's Stem Cell Treatment Center will continually improve our research and treatment in order to give hope and happiness to our patients suffering from hopeless diseases.

Health Promotion Center

Nasaret International Hospital's Health Promotion Center will take responsibility for our patients' lifelong health through the cooperation of Korean, modern, and integrative functional medicine.

Cooperative System

Through Korea's first perfect cooperative system of Korean, modern, and integrative functional medicine, we are providing medical services with the greatest quality. With all examinations, a Korean medicine examination of maekjeon and meridian functioning is done along with a Korean constitutional evaluation.

A Differentiated Diagnostic Service

We prepare specialized health screening programs to fit our patients' requests and characteristics - gastrointestinal, female, male, cardiovascular, smoker, youth, stroke, and family specialized examinations.

Diagnosis-Examination-Treatment One Stop Service

After the examinations, patients who are under health risks or have found a disease will be connected to the corresponding department to make an appointment, go through a detailed examination, and receive treatment all in a ONE-STOP service system.

General Examination Center

As a national health insurance organization designated by the National Health Insurance Corporation, Nasaret International Hospital's General Examination Center provides specialized examinations depending on life cycles or occupational classification.

National Health Insurance Corporation Health Examinations

- General health check-up
- Transition cycle health check-up
- Big 5 cancer exams: stomach cancer, breast cancer, colorectal cancer, liver cancer, cervical cancer
- Children's health check-up

Industrial Health Examinations

- Specialized health check-up, health care agency
- Occupational environment measurement

Employment Health Examinations

- General employment
- Governmental employment

Student Health Examinations

Other Health Examinations

Driver's license aptitude test, etc.

Emergency Medical Center

Nasaret International Hospital's Emergency Medical Center is equipped with emergency medicine specialists and medical personnel 24 hours a day, 365 days a year. It has been recognized for its outstanding emergency medical services as it has been appointed the best emergency medical institution in area for the past 5 consecutive years.

Received the best rating for 5 consecutive years for the '2015 Emergency Medical Institution Evaluation,' given to 269 different medical institutions in the region by the Ministry of Health and Welfare.

Emergency Medicine

International Medical Center

Our rapidly growing International Medical Center establishes optimal diagnostic plans and various convenience accommodations from our international patients' arrival to the moment of departure, in order to bring about high satisfaction from our patients.

Coordinator Services

- Translating for international patients
- Helping with admission and discharge
- 3 Airport welcome & send-off
- Rapid email and phone call consultations
- Diagnostic plans & estimated medical fees
- 6 Check-up & examination appointments
- Administrative support for issuing visas
- Transportation, accommodation, and tourism guiding
- Hot-line service on holidays
- Post-management

Visa Check-up

We provide check-up forms in English as requested by various countries' educational departments.

Global Insurance Company Membership Service

With payment guarantee, patient transfer, and tourism services that are the main jobs of international insurance broker companies, we complete contracts with them and provide fast and stable medical services to our international patients who are a member of the international insurance agency.

"For the health and happiness of our patients"

Nasaret International Hospital is equipped with the latest medical equipment in order to provide high quality medical services.

Two Cutting-edge MRIs

Compared to the existing MRIs, signal intensity and sharpness are twice as high, making it possible to accurately diagnose the microscopic anatomy of patients.

Two 128CH MULTI-SLICE CTs

- Possible to film 128 high quality videos in 0.35 seconds
 Full-body shots in 9.4 seconds
- Accurately diagnoses 0.6mm tumors that were originally hard to discover
- Wider entrance space so claustrophobic patients or children can be comfortably examined
- Selective scanning using a sliding table that can be moved from side to side, reduces the amount of exposure by 45%.

Spine Endoscopy Equipment

- The latest full endoscopy device that is used the most around the world.
- Reduces pain and side effects after surgery, along with the recovery period, by minimizing the amount of skin incisions using local anesthesia, not general anesthesia.

Cutting-edge Gastroendoscopy

- Effective in diagnosing early stage fine lesions in the stomach, colon, and esophagus
- Close observations of the mucous membrane and capillary vessels in the narrow areas of the gastrointestinal tract not possible with existing equipment in order to provide precise examinations and diagnoses.
- Reduction of examination time, and pain alleviation.

Cardiovascular Ultrasonography System

- Possible to examine all range of patients ranging from infants to pregnant women
- Accurate diagnosis possible with clear imaging and fast data processing speed

Breast Imaging Equipment

- Approved by the FDA and KFDA for the first time in the world
- Provides both 2D and 3D images at the same time so it can clearly read fine lesions
- Fast scanning speed in less than 5 seconds, minimizing patients' discomfort

Spiral Decompression Correction Exercise Treatment Device

 Designed to perform one-side manipulation treatments in 36 different directions depending on the disc directions so that TARGET POINT treatment is possible following the CT or MR results.

Nasaret Angel Fund Operation

Nasaret International Hospital gathers an "Angel Fund" with funds from the annual Love Sharing Bazaar and our staff's donations in order to give scholarships, volunteer to share side dishes to the elderly, and do medical volunteer work in the area so that we can help fix the health care hierarchy and help the needy in the community.

Volunteer Activities and Cultural Events

Our hospital provides hair washing and bathing services three times a week to the handicapped, and on the Friday of the last week of every month, we provide haircut and beauty services as well. Also, we hold various cultural events for our patients and guardians such as music performances and movie showings, as well as Children's Day and Christmas season events.

Medical Volunteering and Support Activity

Our hospital has been volunteering to provide general examinations and Korean medicine check-ups to the elderly who live in a medical service restrictive area, and we have been focusing on community outreach by holding community events and providing emergency medical clinics for the safety of the citizens. Also in 2015, as a part of the Shared Health Care Program, we have reached out to international children in low-income areas with incurable diseases in order to provide treatment at no cost.

-

Thanks to the warm sincerity and consideration of the nurses who were so kind and always treated their patients with a smile, it has been a comfortable and happy time of healing for the past three days. Thank you so much and I love you!

2015.8 Patient Park

Thanks to Dr. Kang Kyu Chul, who reassured me that the surgery will go well, and to the nurses who played music for me to listen to, I received surgery comfortably and was discharged comfortably.

2015.9 Patient Um

I was so thankful for the specific explanations and consideration of the doctors at every rounding. I still remember the doctor telling me to relax and get better even for another day.

2015.12 Patient Kim

Many thanks to the nurses and therapists in the Rehabilitation Center!

Your smile is the greatest. I was very lucky to have met such a kind and considerate therapist.

2016.2 Patient Kwak

I have received a new life.

In 2006, Seoyeon (at the time age 9 months), woke up from a coma after 17 days that had occurred due to acute hemorrhagic encephalitis, but was diagnosed with intestinal paralysis, general paralysis, and also lost her sight. However, Seoyeon and her mother did not lose hope and tried many modern medicine treatments for 6 years. After 6 years, they decided to try Korean medicine treatments and started to receive treatment from Chairman Lee Kang II. In 15 days, Seoyeon's paralysis was cured, and in a year, she was able to see again.

After a long period of darkness, Seoyeon was able to see again. Having found her expressions back, Seoyeon is not losing hope in learning to speak and write to this day.

"The ultimate purpose that both Korean and modern medicine pursue is to save the lives of all patients. Especially for diseases not curable with one kind of treatment, such as palsy, epilepsy, polio, etc., we can find better solutions through a mutually beneficial cooperative relationship."

Nasaret Medical Foundation Chairman Lee Kang II

국가암정보센터 통계에 따르면 우리나라에서 가장 많이 발생하는 암(갑상선 제외) 은 위와 대장 순으로, 전체 암 환자 중 각각 13,4%와 12,3%를 차지하는 것으로 나타 는 취외 대상 군으로, 언제 집 원자 중 각각 13.45보지 12.35분 자시하는 것으로 나다 나다. 남성의 경우 가장 많이 발생하는 암 1, 2위는 각각 위와 대장이며, 여성의 경우 에는 감상선, 유방에 이어 대장, 위 순서로 많이 발생한다. 연령별로 살펴보면 남성은 35~64세에서 위암이 가장 많이 발생했고, 여성은 65세 이상에서 대장암 발병 위험 이 가장 큰 것으로 나타났다

▲ 맵고 짠 음식 좋아하는 한국인... '위암·대장암' 유병률 가장 높아 우리나라 소화기암 발병률이 높은 이유로 평소 맵고 짠 자극적인 음식을 먹는 것 과 최근 서구화된 실급으로 집을 수 있다. 국민건강보험공단 질병통계를 분석해보 면 2014년 위·대장 관련 질환으로 병원을 방문한 사람은 위염·장염의 경우 약 730 만 명, 치핵66만 명, 소화불량 63만 명, 위궤양 2만 명 등이다. 이는 전체 환자 중 약 19%에 해당하는 수치로 포함되지 않은 기타 집화까지 모두 고려학 경우 실제로는 더 많은 수의 사람들이 위·대장 관련 질환을 앓고 있는 것으로 예상할 수 있다.

Nasaret International Hospital - Caregiver-free Comprehensive Nursing Services

인천 연수구 소재 나사렛국제병원(이사장 이강일)은 지난 16일 포괄간호서비스 병원으로 지정돼 서비스

포괄간호서비스란 간병인 없이 간호사와 간호보조인력으로 구성된 팀이 환자를 간호하는 시스템이다.

현자의 세안, 세발 등 기초적인 위생간호에서부터 식사보조, 이동 및 운동보조, 상처관할 및 체위변경 등 을 통한 옥창 예방까지 환자의 자가 간호 능력 항상과 조기회복 촉진을 돕는다.

나사렛국제병원은 11층 병동 총 10실 45병상을 포괄간호병동으로 지정, 병원 내 전문 간호인력이 24시간 연속적으로 간호서비스를 제공한다.

나사렛국제병원은 이를 위해 서브스테이션. 환자 관찰 모니터, 이동식 노트북 등 환자 모니터링 시설과 낙상 방지용 안전바, 간호사 호출벨, 중앙호출 시스템 등 환자 안전을 위한 다양한 시설을 추가 확충했다.

이강일 이사장은 '올 상반기 메르스 사태를 겪으며 병원 내 감염예방을 위한 대안으로 포괄간호서비스가 주목 받고 있다'며 '이러한 호흡에 발맞춰 이번 포괄간향병동 지정을 계기로 환자들에게 보다 높은 수준 의 간호서비스를 제공할 수 있도록 최산을 다하겠다'고 말했다.

Spring Hikes for Health? Red Light on Your Joint Health

- 낙상사고 집중되는 봄철, 관절질환자 특히 주의

평소 무릎관절이 좋지 않던 A씨는(50대, 여) 얼마 전 운동 삼아 시작한 산행에서 뜻 하지 않은 낙상사고를 당했다. 3월 들어 포근해진 날씨에 가벼운 마음으로 산에 올랐 다가 채 녹지 않은 얼음을 밟고 미끄러진 것이다. 무릎이 골절되는 부상을 입었고, 넘 어지면서 손으로 땅을 짚어 손목 염좌까지 발생했다. 건강을 위해 시작한 등산이 도리 어 건강을 위협하게 된 것이다.

건강보험실사평가원 진료비통계지표에 따르면 실제 무릎관절증으로 병원을 찾는 한 자가 3~5월에 집중되는 것을 알 수 있다. 2009년부터 2013년까지 5년간 월명균 진 료인원을 살펴보면 3월 14.6%, 4월 4%, 5월 3% 증가해 특히 봄철에 환자수가 증가하 는 경향을 보였다. 이는 겨우내 이어진 추위가 풀리며 등산, 트래킹 등 야외활동 인구

이처럼 봄철 산행 중 발생하는 낙상사고는 관절질환을 앓고 있는 사람들에게 더 위험 할 수 있다. 특히 골다공증 환자는 뼈의 강도가 약해져 손목, 고관절, 척추 등 신체 모 든 부위에서 골절 발생 위험이 크므로 각별한 주의를 요한다.

#생후 9개월에 뇌병변 1급으로 진단받았던 장 서연(12세) 양은 일곱 살까지 앞이 보이지 않았 고 장(羅)과 전신마비로 고통의 나날을 보냈다 현대의학만으로는 호전되지 않자 2011년 나사 렛한방병원에서 한의학치료를 병행, 치료시작 15일 만에 장 마비가 해결됐고 이후 시력회복 은 물론 마비증상도 완화돼 현재는 인지기능

는 물론 마이등장도 전화돼 현재는 전시기능 회복에 주력하고 있다. 혼자 힘으로 안 되는 일도 협력하면 기대이상 의 효과를 낼 때가 있다. 일명 '시너지효과'다. 의료도 마찬가지다. 근본치료원리는 달라도 한 의학과 현대의학이 서로 힘을 합치면 놀랄만 한 효과가 생기지 않을까. 이강일 이사장은 이 를 일찍이 가파 | 사례이르채다(이차 | 사례) 에서 30여년 동안 한·양방협진을 통해 난치병 치료에 앞장서왔다.

"한의학과 현대의학이 추구하는 궁극적인 목 전의학과 현대학학에 구구하는 중국학인 학 적은 모두 '환자를 살리는 것'이죠. 특히 단일 의학으로 치료가 어려운 중풍, 간질, 소아마비 등 난치성질환은 상호보완을 통해 한결 나은 해법을 찾을 수 있습니다."

최근 나사렛의 협진시스템은 더욱 탄력을 받 아 순항 중이다. 2014년 국제진료협력센터를 연 이래 세계 각국에서 환자가 방문하고 있는 데 이들 대다수가 난치성질환자이기 때문. 그 는 "한방병원이 같은 의료재단소속의 국제병 는 한성상원이 같은 되요세간조목의 국제성 원과 통합된 후 협진이 쉬워졌고 환자가 양쪽 을 오가야했던 불편함도 해결됐다"며 "특히 다 국어통역이 가능한 국제진료센터 직원들이 외 국화자의 진료예약부터 사후관리까지 책임지 고 있어 센터가 더욱 활기를 띠게 됐다"고 말

이강일 이사장은 "단일적인 치료법으로 호전되기 힘든 난치성질환은 한-양방 협진을 통해 더 나은 효과를 기대할 수 있다"고 강

지난해 말 신설된 통합기능의학과도 든든한 지원군, 동종요법(약을 사용하지 않고 개인체 질을 정확히 파악해 신체 스스로 균형을 이루 도록 돕는 친환경적 치료법)이라는 새로운 치 료법을 제시하며 환자만족도를 높이고 있다. 특히 피부병, 자폐증, 면역계질환 등에 탁월한 효과를 발휘한다고.

극대화해 환자에게 건강과 행복을 찾아드린 지네회에 된지에게 단당의 항목을 찾아르는 다는 병원미션에 부합하도록 끊임없이 노력할 것"이라며 "규모경쟁에서 벗어나 질 높은 의 료서비스를 제공하는데 주력해 전 세계 환자 들이 찾아오는 병원을 만들겠다"고 힘주어 말

Nasaret International Hospital -Medical Tourism Promotion Booth Operation at the 2016 Moscow International Tour Fair

добро пожаловат Международ Больница Назарет Западной и Корейс Традиционейс

나사렛국제병원은 러시아 모스크바에서 개최된 '2016 모스크바 국제관광전(MITT 2016)'에서 의료관광 홍보부스를 운영했다. 행사 기간 동안 나사렛국제병원은 러시아 및 중앙아시아 의료관광 에이전시를 대상으로 주력 의료서비스 상품을 소개하고 개 별상담을 진행했다. 모스크바 국제관광전은 매년 200여 국가(지역)에서 참가하는 러시아 및 중앙아시아 최대 규모의 관광전문 박람회이자 세계 5대 관광박람회 중의 하나이다.

Nasaret International Hospital -Provided Medical Treatment for Young International Patients from Low-income Families

나사렛국제병원은 한국보건산업진흥원 주관 '2015년도 MEDICAL KOREA 나눔의료사업'에 선정, 해외 저소득층 난치병 어린이 환자를 초청해 무상 치료를 제공했다. 이번 나눔 의료사업을 통해 치료를 받은 환자는 엘다나(KOPZHANOVA ELDANA, 여, 6세, 카자흐스탄)와 에르헤스(ERKHES, 남, 9세, 몽골)로, 약 한 달 간 뜸과 침, 사혈치료 등을 통해 증상이 상당부분 호전되어 고국으로 돌아갔다.

Nasaret International Hospital -Sponsored Walkathon for Children with Rare & Incurable Diseases Hosted by the Korean Red Cross Society

나사렛국제병원은 대한적십자사 인천지사 주최로 개최된 '희귀·난치병 어린이 돕기 걷기대회'에서 치료 후원 및 부스행사를 성 황리에 마쳤다고 밝혔다.

의학·한의학 협진을 통한 희귀 난치성 질 환의 치료 분야에서 두각을 나타내고 있는 나사렛국제병원은 적십자사와 뜻을 함께하 고자 대회 후원금 지원과 당일 부스행사 운 영에 나섰다.

이날 행사 부스는 △손 씻기 교육 △한약 시음 △헬륨풍선 증정 총 세 가지 테마로 운영됐다. 손세정 교육기를 통해 손 위생 상태를 눈으로 직접 보며 올바른 손 씻기 방법을 안내했고, 원기회복을 돕는 8가지 약재를 달여낸 '팔물탕(八物湯)'을 시음해 볼 수 있는 기회도 제공됐다. 또한, 어린이 들이 좋아하는 형형색색의 헬륨풍선을 나 누어주며 눈길을 끌기도 했다. Nasaret International Hospital -Appointed as a Supporting Institution for Specialized Programs in Korean Medicine by the Ministry of Health and Welfare

나사렛국제병원은 보건복지부와 한국보건 산업진흥원이 주관하는 '2016년 한의약 해 외환자유치 특화 프로그램' 지원 기관으로 선정, 외국인환자 유치 선도 병원으로서의 포부를 밝혔다. 선정된 기관에는 해외환자 유치 채널 구축, 홍보·마케팅, 인프라 구축 등에 기관 당 최대 2,500만 원(기선정 기관 은 2,000만 원)을 지원할 예정이다.

Nasaret International Hospital -Emergency Situation Management "Life Saver Training Program" Implementation

나사렛국제병원은 연수구 지역 학생들을 대상으로 심폐소생술 및 응급처치방법에 대해 배우는 '생명지킴이 양성교육'을 실시했다. 이번 교육은 심정지의 위험성 및 심폐소생술의 중요성을 알리고, 응급상황에서의 신속한 대처가 가능한 '생명지킴이'를 양성하기 위해 마련됐다. 나사렛국제병원이강일 이사장은 "나사렛국제병원은 인천지역을 대표하는 종합병원으로써 한 사람의 생명이라도 더 살리는 데 기여하고자 이번 교육을 실시하게 됐다."고 말했다.

Integrated Nursing Care Services

Integrated Nursing Care Services Appointed Hospital By the National Health Insurance Service

Nasaret International Hospital will provide much better hospitalization services.

Our institution uses specialized nursing staff to provide comprehensive nursing hospitalization services that enhance the patients' self-care skills and that help promote an early recovery.
